

*Symbol of Perfection*

**Waterdumper model FS2**

**Waterdumper for floating products such as apples**

The bins are pushed under water and the fruits float towards the sorting and packaging machine.

**Advantages:**

- No transfers, and consequently no damages
- Greater capacity possible
- Constant supply of fruits to the sorting and packaging machine
- You deliver a fresh and clean product
- Your bin can be filled up to the maximum

***The specialist in sorting fruit and vegetables***
